Modification notes

26.4.04	Contents have been completely updated		
---------	---------------------------------------	--	--

i The purpose of this document is to inform you about the improved lubrication for the rectification of squeaking, creaking and ripping noises on Mercedes-Benz vehicles.

Comprehensive research of these problems has enabled us to put together this kit for the rectification of noises. The contents of this kit are specially developed and tested to be compatible with Mercedes-Benz vehicles and can therefore be used on all MB passenger cars. This kit contains marked components which are not to be used on parts that are to be painted or on are already painted.

The lubricants can also be ordered individually using the following order numbers:

- A 002 989 06 51 Lock cylinder grease
- A 002 989 07 51 Multipurpose grease, metal
- A 000 989 38 60 Special sliding compound, grease
- A 000 989 35 60 Special sliding compound, spray
- A 000 989 37 60 Special sliding compound, dispersion
- A 000 989 36 60 Special sliding compound, liquid

This lubrication kit is available can be ordered from Germersheim with the following order no.: **A 000 580 03 50** and with the following designation **Noise Damping Service Kit**.

A chart showing the different applications of the kit's contents has been added to the kit.

This kit also contains an overview of the most common felt materials and their qualities. Felt is the preferred material for rectifying rattling noises.

i In order for us to be able to make more improvements to this kit, please send your comments and suggestions to us through your county organizations.
